**City of Lake Jackson
Brazos River Flood Update
Sept. 4, 2017 -5:00 p.m.**

There hasn't been much change in the levels of the Brazos River, Oyster Creek and Bastrop Bayou. Everything is just kind of sitting there.

This doesn't mean there hasn't been a lot of work going on.

Two more pumps were added to help keep the water levels from rising in Jackson Oaks II subdivision. It will be difficult to get levels down until the Brazos River overflow stops flowing into this area.

We added pumping capacity at the Timbercreek site near Lake Road. Water from Buffalo Camp is just pouring into the Lake! The outfall for the lake is at Lake Road and Timbercreek Dr. We are so grateful for all the assistance from local businesses and industry.

We also had 41 members of the National Guard for the day – they were amazing.

The work continues.
